Team Ideas & Additional Features

12 ideas across four people, grouped by feasibility category

Person	Category	Idea	Description	Additional Feature
Person 1	Safe / Conservative	**ADAS for Two-Wheelers**	A bike safety system that detects nearby vehicles and warns riders about potential collisions.	Automatically sends accident alerts to emergency contacts.
Person 1	Stretch / Progressive	**AI-Assisted Smart Beds**	Beds that allow immobile patients to adjust their posture using gestures or voice commands.	Includes automatic posture-adjustment reminders to help prevent bedsores.
Person 1	Risky / Wildcard	**Portable Personal Clean-Air System**	A portable device that provides filtered air in polluted environments.	Displays real-time air quality and filter status.
Person 2	Safe / Conservative	**AI-Based Food Packaging Inspection**	Uses AI cameras to identify and remove improperly packaged food products.	Automatically rejects defective packages using a robotic arm.
Person 2	Stretch / Progressive	**Automated Smart Drip Irrigation**	Uses soil-moisture and temperature sensors to automate irrigation.	Sends mobile alerts when water levels are low or irrigation is required.
Person 2	Risky / Wildcard	**AI-Based Landslide Prediction**	Analyses rainfall, soil moisture, and ground movement to predict landslides.	Sends early-warning SMS messages to people in danger zones.
Person 3	Safe / Conservative	**Smart Water Leakage Detection**	Detects water leaks and automatically shuts off the main water supply.	Allows homeowners to control the valve remotely through a mobile app.
Person 3	Stretch / Progressive	**Coral-Inspired Eco-Concrete**	Develops sustainable concrete inspired by coral structures to protect coastal areas.	Incorporates textured surfaces that encourage suitable marine organisms to grow.
Person 3	Risky / Wildcard	**Shape-Shifting Programmable Microbots**	Tiny interconnected robots that rearrange themselves into different shapes for various tasks.	Can remember and recreate previously programmed shapes.
Person 4	Safe / Conservative	**Sustainable Luxury Fashion**	Creates celebrity outfits using recyclable, reusable, or biodegradable materials.	Collects outfits after events for recycling or reuse.
Person 4	Stretch / Progressive	**AI-Powered Smart Seed Preservation**	Identifies seeds and monitors storage conditions to maintain seed quality.	Sends alerts when temperature or humidity becomes unsuitable for seed preservation.
Person 4	Risky / Wildcard	**Biometric-Based ATM Transactions**	Uses fingerprint, facial, or palm recognition to verify banking customers.	Includes liveness detection to prevent authentication using photographs or recordings.
